COLLECTIONS

Please Read Carefully

These root collections are made up from varieties that have grown well in our own and other gardens we visited and should do well in your garden if given ordinary care. If you give them special care like spraying for insects, watering and the most important, good cultivation, you should be well rewarded for the extra care by the wonderful blooms. Of course there are some garden soils that cause failures, also improper planting and unfavorable weather, and we cannot guarantee the growth in your garden, but we do guarantee safe delivery and in good growing condition; also to be true to name, and will gladly replace any received and found otherwise, or make a satisfactory adjustment. Roots shipped anywhere in the United States.

Our Guarantee

We guarantee all stock purchased from us to be true to name and delivered in good condition, and any stock received otherwise will be cheerfully replaced or properly adjusted. We should be promptly notified and roots returned, when complaint is made if you expect a replacement at once. Roots shipped by us and received by the purchaser with good eye showing can not be replaced. Not responsible in any case for more than the purchase price. On all replacements requested send 10 cents to cover postage and packing.

Roots cannot be replaced where loss is caused by excessive water rotting off the crown or roots in the ground.

Dahlia Show Garden

VISITORS WELCOME

Our show gardens are located on corner of Walker Ave. and 3 mile road, two and one-quarter miles north of West Leonard St. city limits. Call and get acquainted. It pays.

Our gardens and field plantings are at their best usually from September 15th on, as most of the late plantings are in bloom then. Many varieties bloom early in August even if we do not finish planting until July 1st.

GREETINGS FOR 1951

The 1950 growing season was very changeable, but the spring rains came just right for my planting so all the dahlias had a fine start and were strong healthy plants when hit by an unusually early frost on Sept. 26. A few varieties we have left out on account of being completely sold out, while others we do not have enough new roots to offer. So we have added others to take their place.

Thanking the many customers for their nice letters and continued patronage. Hoping my 1951 book meets your approval.

Yours Respectively,

A. T. EDISON

COLLECTION ROOT NOTE: — When ordering these collections, suggest at least one substitute, as we may be sold out of some variety ordered and have to substitute with one of equal or of more value.

ROOT NOTE:—In the shipping of roots especially early in the season we try to send roots showing eye or spot where eye is indicated, but some eyes will not develop even then and we will gladly replace when notified, but the roots must be returned to me when the complaint is made if you expect a refund or replacement at once. All growers have the same trouble, as I get roots, paying \$10.00 to \$25.00 each, and if they fail to eye, I return them for replacement. Roots should not be planted in wet, cold ground as they will rot even if eyed. They will grow a lot faster when the soil has warmed up.

PLANTING INSTRUCTIONS

Roots

Roots should be planted in trenches or holes four inches deep in heavy soil and six inches deep in sandy soil laid flat down (not on end) and covered with earth not over two inches in depth, filling in as the plant develops. Where drainage is poor, do not plant so deep and keep a furrow open between rows to facilitate drainage in wet weather.

You cannot expect a dahlia to grow in any wet soggy ground or expect replacements when planted in ground in this condition. Wait a few days for ground to dry out somewhat.

1950 Plant Note

Owing to the labor conditions, I am not listing plants or rooted cuttings, but will grow them as usual from the later introductions and they can be had when called for at my greenhouse.

All Late Introductions

Below is a partial list of late introductions I am growing in 1951 and expect to list roots in 1952.
